Beka Tevdorashvili

SENIOR FRONTEND DEVELOPER

Tbilisi, Georgia · Full-time · +995 591 24 28 73 · bekatevd@gmail.com · bekatev.github.io/portfolio

PROFILE

Senior frontend developer with 5+ years building complex, high-performance web applications for international clients. Strong in React — hooks, component lifecycle, and state with Redux — and in turning UI/UX wireframes and specifications into pixel-accurate, reusable interfaces. Focused on rendering efficiency, load times, responsive layouts, and consistent behavior across desktop, tablet, and mobile browsers. Comfortable in cross-functional remote teams, Git-based delivery, and clear English communication. Based in Tbilisi; available full-time.

FEATURED WORK

OriginCarpets
Production e-commerce — bilingual storefront, filtering, cart/checkout & payments. Next.js · NestJS · PostgreSQL.
origincarpets.com

LeadHub
Modern product website with clean, responsive UI components and efficient front-end structure. Node.js · Pug · Tailwind.
leadhub.software

EXPERIENCE

Front-End Developer — **2020 – Present**
NeoWeb — Germany (Remote)
- Designed, developed, and maintained React UI for international client products.
- Turned design specs into reusable, pixel-accurate components across desktop, tablet, and mobile.
- Improved load time and rendering, and fixed cross-browser layout and interaction issues.
- Collaborated with design and product stakeholders through reviews and remote delivery.

Front-End / Full-Stack Developer — **2023 – Present**
Freelance
- Built interactive product UIs from specification to deployment, including REST API integration.
- Owned reusable components, responsive layout (Flexbox, Grid, media queries), and performance.

Full-Stack Developer — **2025**
ONVU Technologies (Remote)
- Delivered frontend and full-stack features, including UI implementation and API integration.

Full-Stack Developer — **2025**
Onchained.AI (Remote)
- Built modern, interactive interfaces and integrated application workflows.

Full-Stack Developer — **2024 – 2025**
Asia Pacific Trading (Remote)
- Built responsive business interfaces and supported full-stack delivery across devices.

JavaScript Tutor — **2020 – 2022**
IB Course, Newton's Free School
- Taught JavaScript, practical frontend development, debugging, and implementation habits.

SKILLS

React: Hooks, lifecycle, Redux, reusable components, Next.js

UI: Figma → pixel-accurate UI, Tailwind, Bootstrap, MUI

Layout: Responsive, Flexbox/Grid, cross-browser, touch & pointer

Performance: Code splitting, lazy loading, Vite, Chrome DevTools

Motion: Framer Motion, Lottie, interactive UI states

Tools: Git, GitHub, Vite, TypeScript, JavaScript

Also: Vue, Angular, React Native, Node.js, REST APIs, PHP, Go
